E-Foiling

in Poole Harbour

E-Foil boards are welcome in Poole Harbour where riders adhere to all the Poole Harbour byelaws, collision regulations and the terms of of the mandatory Personal Watercraft (PWC) Permit scheme for Poole Harbour.

E-Foil riders are required to register and pay for a Poole PWC permit, then clearly display the PHC permit sticker and Data Tag identification number where it can be seen whilst underway (e.g. the board's edge or the mast).

The only part of the harbour where E-Foil riders may exceed the 10 or 6 knot speed limits (all year long) is within the marked PWC Area North of Brownsea Island.
If a rider's level of experience and/or the E-Foils design makes safe and consistent operation below the speed limit impractical, they must not use their E-Foil outside this area.

E-Foils may be launched from other vessels, but users are reminded that vessels may not be left unattended at anchor.

E-Foil riders must ensure that they have a means to monitor their speed and should carry a GPS watch if their hand held remote does not have a speedometer.

Incidents of users exceeding the speed limit or not having a PWC permit will be addressed as per the PHC Enforcement Policy
